StudySnap (Student Social Media)

Abstract

In modern educational institutions, students require a digital platform that supports learning, collaboration, and academic engagement. StudySnap is a student social media and learning platform designed to integrate academic interaction, study resources, and gamified learning into a single digital system. The platform allows students to connect with classmates, access educational materials, participate in quizzes, and maintain academic engagement through reward-based activities.

The system introduces a Daily ID Card Scan feature where students can scan their college ID cards to earn StudyTokens that motivate them to stay consistent with their academic activities. Students can also mark their daily college attendance manually through the system.

StudySnap provides several interactive learning components such as quizzes, study missions, and coding challenges that reward students with tokens and encourage continuous participation. The platform also includes an E-Library, allowing students to upload and access study materials in PDF format. Professors can upload lecture videos that students can watch from the professor's profile page.

To maintain academic integrity, the platform includes a content moderation system where administrators review and approve professor-uploaded lecture videos to ensure that only study-related content is available. The system also includes a student connection feature, enabling students to connect with classmates using unique usernames and form academic groups.

The platform is developed using the MERN Stack (MongoDB, Express.js, React.js, Node.js) and aims to create a modern digital ecosystem that combines social interaction with academic productivity.

Objectives

To develop a student social media and engagement platform that integrates learning resources, academic activities, and collaboration in a single system.

To implement secure student authentication using mobile number, ensuring that only verified students can access the platform.

To encourage daily participation through ID card scanning, attendance tracking, and reward-based StudyTokens.

To make learning interactive through quizzes, study missions, coding challenges, and an E-Library for sharing PDF study materials.

To enable professors to upload lecture videos and administrators to manage students, professors, courses, and content moderation within the platform.

To maintain student motivation and consistency through daily login streaks, activity tracking, and reward-based participation.

To provide an administrative system that manages students, professors, courses, and educational content while ensuring content moderation and platform security.

Modules, Sub-Purpose and Features

1. Student Registration & Authentication Module

Sub-Purpose

This module registers students into the platform and verifies their identity using OTP-based authentication through their mobile number.

Features

- Student signup using mobile number and email address.
- OTP-based authentication using mobile number.
- Unique username creation for every student.
- Secure login and logout system.
- Student profile setup during first login.

2. Main Dashboard Module

Sub-Purpose

This module acts as the central interface where students can access all platform features and view their personal academic activity.

Features

- Display of student profile details.
- Access to quizzes, missions, and study activities.
- Daily ID scan and attendance options.

3. Daily ID Scan & Attendance Module

Sub-Purpose

This module motivates students to maintain regular academic participation through daily engagement activities.

Features

- Daily ID card scanning to earn StudyTokens.
- Manual college attendance marking.
- Daily login streak tracking.

4. Quiz & Study Missions Module

Sub-Purpose

This module makes learning interactive by allowing students to participate in quizzes, missions, and coding challenges.

Features

- Subject-based quizzes.
- Coding challenges and study missions.
- Reward system using StudyTokens.

5. E-Library & Study Material Module

Sub-Purpose

This module acts as a centralized digital library where students can share and access study materials.

Features

- Upload study materials in **PDF format only**.
- Organized study material repository.
- Easy viewing and downloading of files.

6. Video Learning Module

Sub-Purpose

This module enables professors to upload lecture videos that students can access from the professor's profile.

Features

- Professors upload educational lecture videos.
- Students view lectures from professor profiles.

7. Student Connection & Group Module

Sub-Purpose

This module enables social interaction among students for academic collaboration.

Features

- Connect with classmates using usernames.
- Send and accept connection requests.

8. Notification & Updates Module

Sub-Purpose

This module ensures that students receive important announcements and updates related to academic activities.

Features

- Notification icon on the main dashboard.
- Academic updates and alerts.

9. Admin Management Module

Sub-Purpose

This module allows administrators to manage users, courses, and platform content.

Features

- Manage student and professor accounts.
- Add, update, or remove student and professor IDs.

10. Content Moderation Module

Sub-Purpose

This module ensures that only educational and study-related content is available on the platform.

Features

- Admin review of professor-uploaded lecture videos.
- Approval or rejection of uploaded content.
- Filtering of Non-Educational material.
- Content verification.
